## Profile

---

My career in data began in practice, on the shop floor. My first challenge was supporting the manufacturing engineer in capturing data for **critical operational KPIs** like **OEE**, calculating units, production costs, and manufacturing times using **Excel and VBA macros**.

The responsibility of improving the indicator presentation led me to use **Power BI** to digitize and track continuous improvement dashboards (VSM, 5S, Kaizen). That's where I discovered my calling for **Business Intelligence**.

Today, I connect that operational discipline with the company's financial and commercial vision. My specialty is designing **end-to-end data solutions**: from **modeling** to **automation with AppSheet** and building **actionable KPIs in Power BI**. The combination of data analytics, financial analysis, industrial engineering, and continuous improvement allows me to understand the **real impact of the numbers**.

I work shoulder-to-shoulder with management to prioritize initiatives, quantify results, and sustain improvements with full traceability. I enjoy collaborating with teams, delivering tools that are actually adopted, and optimizing daily administrative processes.

My next goal is to drive commercial growth: **not just saving costs, but helping the company sell more and make better strategic decisions**. To achieve this, I complement my work with training in **Artificial Intelligence** and the use of **VS Code + generative models** to document, validate, and scale analytical solutions.

## Experience

---

### Business Intelligence Specialist

Coprodesa S.A. (Sep 2024 – Oct 2025)

- Data modeling for ad hoc reports in **Power Pivot** (Excel/Power BI), standardizing sources and preserving the corporate visual standard (existing bookmarks, patterns, and narratives).
- Comprehensive administration of **Power BI Desktop, Service, and Gateway**: requirements gathering, role and permission management, scheduled refreshes, remote support, and controlled content distribution.
- **AppSheet** Automations: governance of all corporate apps (billing, travel expense settlement, contactability KPIs, annual inventory, mileage settlement). Database design, business logic, approval flows, and linked reports.
- Source integration into the **Coprodesa data warehouse (Microsoft Fabric)**: data from internal apps, CRM API, SharePoint/OneDrive processes, and reconstruction of legacy paths for demand planning.
- Use of **Generative AI, VS Code, and GitHub** to document, validate, and accelerate BI deliverables, ensuring auditable versions and replicable solutions.
- Self-management of **process documentation**, functional specifications for apps and reports, and **backlog ticket management**.

### Intern / Continuous Improvement Technician

Eaton (Aug 2023 – Sep 2024)

- Maintenance of folder and data structure in **SharePoint** for Lean KPI calculations (5S, VSM, Kaizen, Gemba Walk, among others).
- **Time studies for unit costing, management of continuous improvement projects** with supervisors and engineers from other areas, and coordination of recognition.
- **Tracking of savings projects**, recording progress in the system, reporting results to stakeholders, presenting proposals, and acting as a facilitator for technical workshops with professionals from different areas.
- Updating **work manuals** in coordination with multidisciplinary teams.

## Technical Skills

---

<b>Modeling &amp; SQL</b>	SAP B1, Microsoft Fabric, datamart design, operational/commercial source integration, and query optimization.
<b>Power BI (Desktop/Service/Gateway)</b>	Dataflows, DAX, Power Pivot, RLS, access governance, scheduled refresh, and remote desktop support.
<b>Advanced Excel</b>	Power Query (M), Power Pivot, Pivot Tables, and VBA macros for data capture and cleaning on the shop floor.
<b>Automation with AppSheet</b>	Database design, business logic, approval flows, PDF generation, and maintenance of the corporate app portfolio.
<b>Integrations &amp; APIs</b>	CRM connectors, SharePoint/OneDrive, pipelines to Fabric, and reconstruction of legacy paths.
<b>AI &amp; Development</b>	Python (pandas, scikit-learn), VS Code, GitHub, generative models, and Copilot for documentation and prototyping.

## Education

---

- **B.Sc. Industrial Engineering** (+80% completed) — Universidad de Costa Rica (UCR).
- **Specialization in Business Analytics: ML & AI applied to business** — Tecnológico de Costa Rica (TEC).
- **Finance for Non-Financial Managers with Excel** — Data Grow Up.

## Licenses & Certifications

---

- **Google Business Intelligence Certificate** — Google Career Certificates Sep. 2025  
*Credential ID: 95e24402-f172-4289-a169-9daa2fee9436* | [View credential](#)
- **Beginner: Google Cloud Data Analytics Certificate** — Google Career Certificates Oct. 2025  
*Credential ID: 95e24402-f172-4289-a169-9daa2fee9436* | [View credential](#)
- **Google Data Analytics Certificate** — Google Career Certificates Jul. 2025  
*Credential ID: 95e24402-f172-4289-a169-9daa2fee9436* | [View credential](#)
- **Building No-Code Apps with AppSheet: Automation** — Google Cloud Skills Boost Jul. 2025
